INFORMATIONAL PRACTICES GUIDE

## INFORMATIONAL PRACTICES GUIDE

### • WHAT IS COVID-19?

New Coronavirus Disease (COVID-19) is a virus first identified in China's Wuhan Province on January 13, 2020 as a result of research conducted in a group of patients who developed respiratory symptoms (fever, cough, shortness of breath) in late December 2019.

### • WHAT ARE THE SYMPTOMS?

Although it has been reported that there may be cases without symptoms, the proportion of them is unknown. The most common symptoms are fever, cough and shortness of breath. In severe cases, pneumonia, severe respiratory failure, kidney failure and death may develop.

### • HOW IS IT TRANSMITTED?

It is transmitted by the inhalation of droplets scattered in the environment by coughing sneezes of sick individuals. The virus can also be picked up by touching the face, eyes, nose or mouth without washing after contacting surfaces contaminated with respiratory particles. Contact with eyes, nose or mouth with dirty hands is risky.

### • PURPOSE

The purpose of this manual is to address COVID-19 contamination concerns, to carry out studies to meet high hygiene and safety expectations, to plan training programs for our personnel, and to determine the procedures and principles for preventing the transmission of Covid -19 virus.

### • SCOPE

This guide covers all activities performed at Susesi Luxury resort to prevent the spread of the Covid-19 virus.

Susesi Luxury Resort has integrated;

- ISO 9001 Quality Management System
  - ISO 14001 Environmental Management System
  - ISO 10002 Guest Satisfaction Management System
  - ISO 22000 Food Safety Management System
- and continuing its work with a systematic approach since 2007.

All services we provide at our facility comply with the circular and criteria issued by the Ministry of Tourism regarding Covid-19 outbreak measures and practices and receive professional support in this regard. Our internal hygiene team, which consists of experts, periodically checks and verifies all ongoing studies.

### ● AIRPORT - HOTEL TRANSFER SERVICE

- The hotel's vehicles will be disinfected on each transfer.
- Cologne and hand sanitizer with an alcohol ratio of 70% will be kept in the vehicle.
- Staff's body temperature (driver or accompanying staff) will be measured daily.
- The driver and the accompanying personnel have to take protective measures such as masks and gloves.
- Contact and conversation with the passenger will be kept to a minimum.
- Our guests will have their temperature measured before boarding the vehicle.
- During the journey, our guests will be asked to wear masks.

## • CHECK IN AND REGISTRATION

- Upon entering the reception, guests' luggage will be disinfected with alcohol-based surface disinfectant and taken to the luggage area. Luggage will be labelled as being disinfected.
- Guests' body temperature will be measured by a non-contact thermometer at the reception entrance. Our guests whose body temperature rises above 38 °C will be taken to a pre-determined isolation room and directed to the health care facility.
- All guests who request a mask upon arrival will be given a mask.
- During Check-in, the procedure will be followed according to the social distance rule.
- Cologne will be offered to the guest during the reception.
- The reception entrance will have a stand alone non-contact hand disinfectant and disinfectant hygiene mat.
- A distance of at least 60 cm between seats and chairs of at least 1.5 m will be left between the tables in the reception area.
- Our guests will be taken to an empty, ventilated and sterilized room at 12-hour intervals. Room key cards will be delivered to our guests after being disinfected within UV lamp box.

## INFORMATIONAL PRACTICES GUIDE

- At the reception, there will be hygiene wipes and disinfectant so that guests can keep their personal belongings (mobile phone, tablet, etc.) disinfected.
- Front desk staff and bellboys will use personal protective equipment unless the hotel management has notified them otherwise.
- In order for infected waste to be collected in accordance with the regulations, 'infected waste bins' will be kept in the reception area.
- The reception area will have information brochures and posters on Covid 19 in at least 4 different languages.
- Entrance to the room is set at 14:00 for efficient cleaning and disinfection procedures.
- The front desk will be disinfected every 15 minutes.
- The car keys taken from the guest will be wiped with disinfectant wipes and taken to the key locker and the guest will be given a car card.
- Reception desk, floor, table and chairs will be disinfected at regular intervals.
- Each operator's computer will be specified in the desk and maximum attention will be paid not to use any other computer.
- Keyboard, mouse, phone, cash register Pos machines and printers will be disinfected every half hour. All Pos devices will have contactless payment capability.

INFORMATIONAL PRACTICES GUIDE

- Our guests will be asked to fill out an information form on whether they have had Covid-19, where they have been in the last 14 days, and if any, chronic ailments.
- Call center employees will be knowledgeable about the measures taken at the hotel at least as well as the personnel standing at the front desk and will be able to provide complete and accurate information on the questions that may come over the phone.
- The use of the computer and phone in the Call Center will not be permitted to be used by other personnel.
- The common internal phone and phone chargers available at the reception will be deprecated.

• **VALET SERVICES**

- Baggage of our guests will be taken to baggage area and disinfected.
- Our guests will be given protective materials upon their request every time they leave the facility and check out from the facility.

## • GUEST RELATIONS

- Guest Relations staff have to follow the social distance rule when communicating with our guests.
- In the Guest Relations desk, cologne and disinfectant will be kept available and the materials used will often be disinfected.
- All guests exhibiting Covid-19 symptoms within the hotel will be notified to the doctor's office and management. In the same way, health status of guests that will have to visit the hospital will be monitored.
- Guests will be accompanied to their rooms by respecting social distance rules and provided information.
- Guest relations personnel are required to know, follow and respond to all measures taken for COVID -19 in the facility.

## ● HOUSEKEEPING

- All personnel that contact guests will use personal protective equipment.
- Hygiene measures taken in rooms will be reported on info channel.
- The amenities in the guest rooms will be presented to our guests in disposable bags.
- Room curtains and similar items (bed runner, chair, seat etc.) will be disinfected by Steam Machine. All textile products will be washed in temperature of at least 65 C.
- Disposable cloths will be used during cleaning.
- After Check-out, rooms will be disinfected with ULV device after cleaning.
- During room cleaning, bed textiles will be removed and rooms will be aired during cleaning.
- All tools and equipment used (trolley, bucket, dustpan, cloth, mob etc.) will be cleaned regularly and then disinfected with alcohol-based surface disinfectant.
- The room that has been prepared for check-in will be labeled with CLEANSTAY room seal and INFORMATION card about the hygiene check indicating that no one has entered the room after detailed cleaning.

INFORMATIONAL PRACTICES GUIDE
